Whole Number 546

Voting on the Compulsory Pool.

The agitation for a compulsory wheat pool has gone on for in the neighboring province of Saskatchewan that the question of who are to have a voice in the referendum on the proposal is now under discussion.

The idea of those behind the movement is to have the vote restricted to grain growers. If two-thirds of those present at the referendum, the Government is to pass the necessary legislation.

The compulsory scheme has met with a constantly increasing degree of favor in Saskatchewan during recent months. This, no doubt, is largely due to the prevailing opinion of farmers which always lead people to grasp at remedies without considering to what these will lead.

The unfairness of forcing anyone to market his product thru a pool, whether he believes in that system of doing or not, is self-evident, says the *Edmonton Journal*. It remains "unthinkable" as the U. F. A. president declared, that a Legislature would make the necessary statutory provisions for this.

For the sake of the future of the co-operative organization which has been built up to such proportions on the voluntary principle, it is high time for what Mr. Wood described as a "mental St. Vitus dance" to cease.

Wheat Certificates

About nine resolutions were presented, at last week U. F. convention in Stony. One was that from Winterburn Local, moved by Mr. Geo. Herington, and to which he spoke at some length. The resolution reads:

Whereas, owing to our inability to market our Canadian wheat crop, a situation has arisen which threatens to cripple or destroy the whole business of Canada.

Be it resolved that we request the Federal Government to issue wheat certificates or dollars redeemable in wheat, and convertible in taxes.

And be it further resolved that we request the Federal Government to over take the 1930 crop, at a price approximating the cost of production, and pay the producer for the same in wheat certificates.

No Reduction in Phone Rates

A matter which was up for discussion at the U. F. convention in Calgary this week was that of a reduction in the rates on rural phone lines.

"In view of the loss on operations, a reduction in rural rates does not seem possible," says Hon. Y. W. Smith, Minister of Telephones, who confirms from a departmental standpoint the statement recently made by Premier J. E. Brownlee that such a reduction cannot be made.

A further reason, says Mr. Smith, lies in the fact that 65 p.c. of telephone users of the system are in good standing with their accounts, and it would not improve the financial standing of the utility if the rates were reduced to meet conditions among a minority of delinquents.

Large Councilors Meet.

Large Councilors held their regular meeting in Stony on the 15th, with all present, and Reuben R. Goetz in the chair. Various matters were up for discussion.

It was arranged to hold the annual meeting early next month. As the annual meeting alternates between places in the east and west end of the Municipality; and, as the last annual meeting was held at Duffield, it is proposed to hold the next meeting in Stony Plain, about the second Saturday in February.

Nominations for three new Councilors will be taken at this meeting; and quite a lot of interest is being taken as to whom the new men will be in one or two of these divisions. The Councilors who automatically drop out this year are those from Divisions 1, 4, 8. In the latter division Mr. R. Goetz is expected to oppose to the present incumbent, Councilor R. Goetz, as already is said, a movement is being made for the support of a strong opponent in the redoubtable Reuben, whose action as Reuben has been the cause of much discussion.

Keep Cool.

Foreign Minister Briand, of France, when recently taken to task by one of the Nationalist leaders who charged him with lack of firmness in dealing with the existing situation, answered with some show of spirit: "I believe the best service one can render his country just now is by remaining cool."

Another state executive, Marcus Aurelius, gave practically the same counsel in the second century of this era, when he said: "Do not be whirled about, but in every movement take respect to justice, and on the occasion of every important matter the faculty of understanding." Or, more briefly, keep cool.

The advice to keep cool, such a "timid" statesman's publication, is sound advice to everyone at all the beginning of 1931. Cool, but it is good advice at all times. The advice will be just as sound at the end of 1931 as at the beginning, and at all times intervening. The top quotations above demonstrate this, inasmuch as the advice embodied by an outstanding statesman of the second century is repeated by one of our leading world statesmen in the twentieth century. The words may be different, but the meaning is the same.

Do not be whirled about. Keep cool.

When the stream of life is flowing gently toward its destined port or goal, following a well marked channel, with hardly a ripple on the surface, it is comparatively easy to keep cool. There is nothing to whirled about, and in the resultant tide of prosperity we pride ourselves on our strength and buoyancy of the stability and greatness of our country.

But it is when, feeling these safe from a sense of false security, whether in our individual or national life, we reach the rapids, and rocks of disaster loom up ahead, that we are inclined to be whirled about. Then is the time for cool heads, stout hearts and steady hands. It is then that our strength will be proven, and the stability and greatness of our people and our country established.

In the realm of nature, cyclones and tornadoes result from the impact of hot air currents with cooler currents, the one rising, the other descending. Conflict ensues. So in the realm of world economics, business depression follows inevitably upon periods of abounding prosperity. Just as heated air becomes inflated, so does man in his business enterprise become puffed up. Both ultimately must be deflated, and it is in the process of deflation that trouble comes.

Then is the time to keep cool. When the sun is shining, and storm clouds are absent from the sky, and the barometer is steady, a ship's captain has a comparatively easy time, but when the storm breaks and the hurricane roars, and the ship is tossed and whirled about, it is essential that the captain remain cool and not whirled about.

This old world is just now in a "storm centre." It is passing through it; in time it will emerge. But it is now that we must all keep cool; it is now that it would be fatal to be whirled about. The present is not the time to abandon the old charts which have guided us in the past. Now is not the time to throw the compass overboard, and wallow against the captain. When we have finally emerged from the present difficulty we should, of course, take stock of our harrowing experience, and endeavor to devise ways and means to prevent or lessen the force of another such storm. But while the storm rages, keep cool.

Keep busy: work harder than ever before and work cheerfully, knowing that thereby the greatest task will be made the easier to bear; keep the faculty of understanding in full play; take short advantage of every opportunity. Don't be stampeded and don't be discouraged. Let every one put his shoulder to the wheel and all push together.

To one and all, now and for every day of this year, is presented the admonition of the ancient Philistine leader: "Be strong, and quit yourselves like men."

Yet Gold Found In Japan

Mining Engineers Discover One Of Unprecedented Wealth

A gold field, which is declared to be of unprecedented extent and wealth, has been discovered in Formosa by mining engineers representing the Tokyo Imperial University. Dr. Hideo Yokouchi, head of the expedition, estimates the amount of gold available to aggregate \$2,500,000. The deposits, he said, extend for approximately 150 miles and are situated in various parts of the island. "I actually picked up gold dust in river beds, in the mountains, on the plains and even on the streets of small villages," Dr. Yokouchi said.

Vegetables From U.S.

Canada Reports Large Quantities Of Potatoes And Beans

During the last six months of 1930, Canadian like more potatoes and beans grown in the United States than the people of any other foreign country, according to a commerce department report. Despite the counter-vailing duty of 75 cents a hundred-weight instituted in May, Canada took 45 per cent. of the total export crop of potatoes during that period. The Dominion took about 40 per cent. of the total export onion crop. Canada paid less than a billion dollars for the early potatoes and less than \$200,000 for the onions.

Was Weak and Run Down

Could Scarcely Be Housework

Mrs. Edward A. Allen, Benning, Alta., writes: "I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework. In fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50¢ a box

Sold by all drug and general stores, or direct from the makers at price by The W. H. V. Co., Ltd., Toronto, Ont.

Prize For Timothy Seed

World, Champion Of Grand Prizes Awarded C.N.R. Cash Prize

In recognition of having won the world's championship for 1930 in Timothy seed, Robert Cochran, of Grand Prairie, Alta., has been awarded the special Canadian National Railway's cash prize granted at the Chicago International hay and grain show in that competition.

Announcement has also been made by R. Knight, of the Canadian National Agricultural Department, that the special prize for top place in alfalfa seed at the same show goes to Nick Chaplin, of Karier, Alta., who has been a winner in this field for some years. Cochran, too, has been taking championships at Chicago for many years, the donors of the prize say, but this is the first time he has taken first place as a grower of Timothy seed.

Overwork or Worry

Takes the Health Of Thousands Of Young Girls

In the "teenage" years when school or office work is exacting and outside activities use up so much energy, many girls undermine their health and spoil their happiness for years to come.

At such a time Dr. Williams' Pink Pills will be found most valuable. They purify and enrich the blood; build up the nerve cells and correct run-down conditions. Concerning them Miss Margaret Torrey, Indian Road, Toronto, Ont., says: "When I was attending high school I suffered a complete breakdown. My heart would palpitate at the least exertion; I could not sleep and nothing I ate agreed with me. I began taking Dr. Williams' Pink Pills and before long I gained in weight and every distressing symptom left me."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fare a Necessity

Market For Furs Has Not Suffered During Hard Times

The success of any business lies in the market demand. It might have been expected that under existing depression for farming would suffer heavily. For some reason, however, this has not been the case for good furs, even at the late winter sales, brought fair prices. From this it would appear that furs are more or less a necessity, particularly in the northern countries.—Animal Report, Federal Department of Agriculture.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Agriculture Needs Help

Ways and means have been devised for helping all the industries except agriculture. Thought should be directed at once to a policy that will bolster up farming. If agriculture can be made even tolerably prosperous all other industries will derive more benefit from the reflected prosperity than they could ever hope to enjoy from a tariff as high as the peace tower on Parliament Hill.—Farmer's Advocate.

Ashtun Haven's Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you are in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and save hours of awful suffering.

What Price Glory

Judging from an incident which occurred recently at the Balfour Technical school, Regina, that city might still be in want of space and tea, for all one gentleman overseas knows about it. The machine delivered a science catalogue to the technical school mailed from London, England, advertising scientific equipment. It was addressed simply: "Science Master, High School, Regina, North West Territories." What price glory, the schoolmaster?

W. H. V. 1674

Dietary Lives On Raw Food

Advocates Simple Diet In Order To Keep In Good Health

Hard times and unemployment distress could be greatly lessened, according to Dr. Julian P. Thomas, Winnipeg food specialist, because one bushel of wheat and one bushel of oats, together with a little fresh vegetation, would keep a man well nourished for at least a year.

In support of this startling assertion, Dr. Thomas cites an experiment performed by himself some forty years ago, when he lived on nothing but raw wheat and water for a period of ninety days. At that time the wheat cost \$1 per bushel. When he started the experiment, he had such a weak stomach that he could not eat sufficient ordinary food to keep going. On the raw foods he became so strong and healthy that he was able to turn his excessive energy into money.

Upon investigating the subject, he found that some people in all of the older nations have lived as he is now living, some of them attaining such old age that modern folks do not believe the accounts, even when they occur in the Bible. The fact is, Dr. Thomas was first induced to pay attention to his diet through reading the Book of Daniel. His first experiments were started years ago, and many people who laughed at his ideas. But all of these people are now dead, and he is still going strong, with the diet he had that he put him for one or two hundred years, and that each day of his life will be happy and vigorous.

An Accurate Clock

Designed For Timing Football Matches At Highbury, England

A novel clock has been installed on the football grounds at Highbury, England. It is a forty-two minute timepiece, and at half-time and time it sounds an electrically-worked hoarse. From one to forty-five minutes are marked on the face in black. From forty-six to ninety they are in red. If a player is injured during the course of a match, the operator can stop the clock at once, for it is worked by ordinary clockwork mechanism. Thus, this clock can be adjusted so as to measure the exact duration of actual play. This mammoth timepiece weighs one and a quarter tons without its frame and is no less than eight feet in diameter. It has been designed for the sole purpose of making the timing of football matches as accurate as possible.

Natural Gas

The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 640,000 tons of coal.

COUGHS/COLDS

Caution consumers can quickly dispel colds and coughs by using SPONN'S COMPOUND

Produced by lower centers every where, colds are the result of a virus. Sponn's Compound is a powerful germicide and kills the virus. It is a safe and effective remedy for colds, coughs, and all other respiratory ailments. It is sold in all drug stores and by mail from Sponn's Compound Co., Ltd., 251 Galt St., Toronto, Ont.

Extension Of Market For Honey In Baking Industry Investigated By National Research Council

Research of the market for honey in the baking industry would seem to be in the direction of increasing the use in sweet goods such as sugar cookies, rather than in the manufacture of bread. In fact, a common belief, states the report of an investigation in the laboratory of the University of Montreal, issued by the National Research Council's Associate Commissioner on Food Research.

It has been found that the substitution of honey for sugar in the manufacture of bread would result in a more rapid rate of fermentation and in an improvement in the flavor and keeping quality of the bread. The study also reported which was made with "scientific assistance" from the National Research Council and the Canadian Wheat Board, by the former W. F. Gosselin and Dr. J. W. Gosselin, 1936-1937, for the National Research Council.

The attention of the National Research Council is thus being turned to the use of honey in baking, where its flavor, nutritive value and power to absorb moisture are particularly advantageous.

It was found that the use of honey in bread making is not a new thing, but that it has been used in the past. The study also reported which was made with "scientific assistance" from the National Research Council and the Canadian Wheat Board, by the former W. F. Gosselin and Dr. J. W. Gosselin, 1936-1937, for the National Research Council.

Figured On Yeasty Days

Worker's Income Depends On Number Of Working Days

"This city is practically bankrupt," This is a sentence in a letter received from Detroit. It probably means only that Detroit is suffering badly from the business depression, and that people there are desperate.

It is a little singular that with Mr. Ford paying \$7 a day to his employees—or so the world understands—and as setting a fine example to all employers, that there should not be good times in Detroit. Perhaps Mr. Ford only pays this wage to his men when they are working, and it may be that they don't work steadily.

Seven dollars a day don't mean much to a man if he only gets work occasionally. That would mean \$2-126 a year of 206 working days. But if a man's yearly income only averages \$1,396 a year that would be only \$4 a day.

The problem for wage earners is to get a living wage by the year. It would seem that a bricklayer earning \$18 a day would really only be in receipt of \$5 a day if he only worked six months of the year.

Workingmen have to live whether their jobs hold out or not. All their calculations should be on a yearly basis.

New Road Composition

A new composition for highways recently discovered in Cape Town, South Africa, is said to cut the cost of road making one-half as compared with ordinary material. Double the life of the road and halves the length of time of laying.

"Do you speak French?" "Yes, but I don't like it, so I have to think about it."—Exchange from Paris, Stockholm.

Financial Report Gives Cause Of Depression

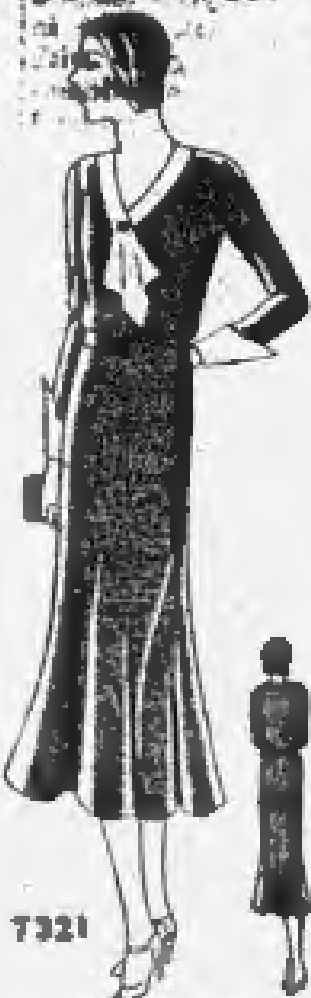

Men Unable To Control Machine They Have Created

"Human beings have not learned how to control the machine they have created," declared the Bank Monthly, noted British financial expert, when questioned as to the cause of the present world-wide depression on his arrival at Montreal. Mr. Bunt is a director of the Bank of England, and chairman of the Imperial and International Communications, Limited.

Financial member on the executive council to the Viceroy of India, Mr. Bunt is well qualified to speak on that country, which, he said, was really for a greater measure of responsible government. He expressed pleasure in the appointment of Viscount Willingdon, governor-general of Canada, as the new Viceroy.

For Mrs. A. Thayer

IT'S SWAGGER

All Tingley models are created and sketched in Paris and the patterns are made in New York.

Every woman knows she can't have too many frocks of sports character in her daytime wardrobe.

Today's mode is especially suitable for the college girl and the business woman.

It is a rich dark green tweed mixture with white silk piping trim. The cross-grain jacket collar is accented by a brown bottom. The Coonick cuffs are jaunty.

The seaming at the front of the dress, conceals big buttons. The skirt flares, slight flared bottom.

There are any number of lovely woolen fabrics that will make up charmingly in this model, as well as jersey, crepe marocain and crepe plain and patterned wools.

Custom crepe and crepe silk in travel prints are also smart.

This pattern may be obtained in sizes 16 to 20 and 20 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or cash) to Pattern Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Live Stock Improvement

Dr. Riddick, Dominion Dairy Commissioner, Says Market Needs Attention

"Persistent testing of herds and direct efforts at improvement of stock are the most important questions before the dairy farmers of Canada," said Dr. J. A. Riddick, Dominion Dairy Commissioner, who addressed the annual convention of the Ontario Association of Dairy Producers at Toronto.

Farmers were facing the prospect of a poor year, but, he said, the average farmer "is having very little if not quite no milk every year by his failure to give attention to his matter as to be in through the drop in value at the present time."

"The average annual yield of milk per cow in Canada is now thought to be about 4,000 pounds, or the equivalent of just about 600 pounds of cheese. If this yield were increased by 20 per cent, which is really possible, it would be equal to an increase of two and one-half cents a pound on the original 600 pounds of cheese at 15 cents a pound after allowing for the cost of manufacture," Dr. Riddick said.

From reports already received, the commissioner estimated butter production in 1936 was probably 18,000,000 pounds higher than in 1935.

Low Price Insect Fash

Damage To Saskatchewan Crops Estimated To Exceed Ten Million Dollars

The year 1936 is referred to as one comparatively free from insecticide outbreaks of insect pests. But, the annual report of the Dominion Department of Agriculture rates as a conservative estimate of the damage by the major insect pests to the wheat crop in Saskatchewan alone \$10,012,000.

A saving of \$25,000 in one district in Alberta through a local control campaign in connection with the sugar beet crop, and another case of a saving of \$5,000 on one farm alone as the result of control work with the wheat stem sawfly, show rather conclusively the value of the work being carried out under the direction of the Entomological Branch of the Dominion Department of Agriculture.

Bee-Keeping Profitable In Alberta

Bees have proven to be a very profitable and practical division of agriculture in Alberta and today represent one of the province's youngest and fastest-growing industries, in the opinion of H. L. Luther, head beekeeper at the Lethbridge Dominion Experimental Station.

Life Story Of J. B. Tyrrell, Eminent Canadian Geologist, Makes Interesting Reading

Canada's Bacon Trade With Britain Small

Domestic Cured Supply Market Now Almost Self-Sufficient

Canada supplied only 20,000 hundred weight of bacon to the market in Great Britain of the 7,114,000 hundred weight imported in the first 10 months of 1936, according to trade returns. The value of the imports of bacon was \$24,000,000, of which the value of Canadian bacon was \$400,000.

Imports of Canadian bacon by Great Britain is quoted as 70,000 hundred weight of the total imports of 200,000 for the 10 months.

Commenting on the amount of Canadian bacon and bones placed in the British market, W. Waldron, provincial markets commissioner, said recently: "The marketing of Danish bacon in England is carried on to a great extent by the Danish Bacon Company, Ltd., London, England. Bacon is received by the company from 45 factories in Denmark. The company has depots at London, Hull, and Liverpool. It is well established in England and its bacon is popular."

Mr. Waldron continued to say that the sales of the Danish Bacon Company in England reached \$25,000,000 each year and that all the Danish bacon imported by England was not handled by the bacon company.

Feeded Milk

Saskatchewan Government Will Encourage Manufacture Of Product

The Saskatchewan government is fostering plans to encourage the manufacture of powdered milk, as used extensively in the British Isles, by those poultry raisers who provide the British market with milk-fed chickens. The possibilities of such an industry are explained by W. Waldron, provincial markets commissioner, who is back from the World's Poultry Congress in London, England, and who points out that part of the manufactured product could be used for poultry-raised birds.

WAR HERO OF FRANCE

Interesting character study of a French soldier, hero of the Marne and Somme, is the story of French soldier (1914-15), who died in Paris following an illness that necessitated amputation of one leg. The soldier, bearer of British Order of Merit, and Grand Officer of Legion of Honor, would have been 65 years old January 4.

Scientists, particularly Canadian scientists, tell a very interesting story, and it is often hard to get at the facts of lives in which the real gold of romance which often underlies their careers.

For this reason, a biography of that eminent Canadian geologist, J. B. Tyrrell, written by his life-long friend, W. J. Gosselin, B.A., will be welcomed in that it tells a thoroughly interesting story with painstaking care and throws much light on this type of explorer-geologist who has made such a big contribution to the development of Canada.

Mr. London tells of the geologist as a boy in Wexford, Ontario, wandering after school hours about the woods collecting specimens of rocks and fossils; developing a taste for the use of the revolver and other going to Upper Canada College, where his scientific bent received recognition, and thence to Toronto University, where he attained the highest honors in geology, chemistry and mathematics.

Then we see Tyrrell coming to Canada, his first position with the Geological Survey, and his exploration of the West. That was in the early twenties, when Calgary and Edmonton were little villages, when the prairie was still the place and the hills were the lot of the pioneer. Journey after journey was taken, the great gold fields, the great fields of the Rockies, through Saskatchewan and Manitoba, and to the outposts north of latitude fifty.

Particularly important were Tyrrell's surveys in the Red River basin. Coal mining in this area was then a dream of the future, and the subsequent development was made in the splendid reports turned in by this great geologist. He was the first man on the continent to discover the remains of dinosaurs, those gigantic animals which millions of years ago roamed in the foothills of Alberta. At great personal risk he and his surveying party brought the first specimens of these animals to the National Museum.

Tyrrell was sent to the Yukon just before the great gold rush of '96. The lure of gold got into the blood. He resigned his job with the Geological Survey and with a mining friend went out to make his fortune. He nearly starved for a time, then prosperity came his way. Contracts for expert opinion poured in, claims were taken up, companies formed and for some years his income ran to \$20,000 a year.

But the day of placer mining was passing; he failed to get the financial support for his biggest property, he was involved in costly litigation, and by 1905 he decided to bid farewell to the land of the Midnight Sun. In this part of the story we see Tyrrell as it really was, a man of wild license, of mad gambling, of hard days when gold was washed in abundance from the river bed followed by wild nights when it flowed into gambling halls, into the churches of painted women or was squandered on the joss of a card.

Tyrrell came back from the Yukon defeated by the success of many who had been lured by the spell of El Dorado, but not much richer in pocket. Later he accepted a very remunerative position as chief geologist for a great Anglo-French mining corporation and resumed his exploration and investigation in every part of the Dominion, but particularly in Northern Ontario. A few years before the Great War he made the most important survey of the Hudson Bay district ever undertaken at the request of Sir James Whitney. Still hale and vigorous at 73 he is today recognized as one of the greatest mining and geological experts of the continent.—Ottawa Journal.

Would Not Read It

A newspaper dated July 26, 1906, just found in Chicago, Scotland, contains the following item: "Three shipwrecked sailors, who were found on a raft, and during their drifting found the bodies of two men and one other man."

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 87 Stanley St., Kingston, Ontario.

WORLD HAPPENINGS BRIEFLY TOLD

An increase of \$5,592,818 (about \$17,117,472) in Britain's adverse trade balance for 1934, as compared with 1929, was revealed in board of trade statistics.

The United States senate immigration committee has referred the Reed resolution providing a two-year ban on immigration to a sub-committee for consideration of changes.

Exclusion of Orientals from ownership or control of Crown lands in B.C. is sought in a petition to the provincial government by the White Canada Association of Vancouver.

Inquiries for Canadian products have been received by L. M. Cosgrove, Canadian trade commissioner to Shanghai, resulting from the Canadian trade delegation's visit.

There should be no fear regarding disposal of the 1934 B.C. canned salmon pack, in the opinion of Major J. A. Motherwell, chief supervisor of fisheries.

Three men were killed and one injured when a Royal Air Force bombing 'plane crashed into a dyke bank at this village on the border of Nottinghamshire and Lincolnshire, England.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas passing around your heart, from nervous acidity, bloating or pain of indigestion. Stop burping. Whenever you need quick stomach relief, take a little Bisulphate Magnesia—powder or tablets. It breaks up gas, neutralizes acids and keeps the stomach sweet and strong, and indigestion perfect. At all good drug stores.

Increased Egg Production

At a meeting of the Alberta Poultry Breeders' Association the other day, S. G. Carlyle, livestock commissioner, remarked that present conditions in Western Canada pointed to a 300 per cent. increase in egg production next spring.

Pay For Position

In some places where tips are abundant, the employee pays the employer for the right to work for him, declared a witness during a recent hearing before the ministry of labor commission in London.

SUNDAY SCHOOL LESSON

JANUARY 28

PHILIP'S TRIUMPH

October Text: "In the night, Himself, hath suffered being tempted. He is able to succor them that are tempted."—Hebrews 2:18.

Lesson: Luke 22:1 to 43.

Devotional Reading: Romans 8:31-39.

Explanations and Comments

The Nature Of Christ's Temptations, verses 1, 2.—Yielding to the control of the Holy Spirit, which had come to Him in a special way at His baptism, Jesus went from the Jordan into the neighboring wilderness, that He might there meditate undisturbed upon the work God had given Him to do. As the story is told in Mark: Jesus seems to have waged His great struggle throughout His wilderness journey, but as it is told in Matthew and Luke, the specific temptations seem to have come at the end of the period.

The Temptation To Free Himself From the Limitations Of His Humanity, verses 3, 4.—During a long period Jesus had eaten nothing, and when He was hungry the devil said unto Him, "If Thou art the Son of God, command this stone that it become bread." The word "if" may be taken in the sense of "since." Since you have the power (Jesus had just been assured of this at His baptism), why not make use of it for yourself? The question which Jesus had to settle was, should He for His personal relief use power which was given Him for the sake of the kingdom, or should He trust His Father and accept whatever sufferings His Father might send? His answer was, Thou shalt trust.

The Temptation To Establish an Earthly Kingdom Rather Than a Spiritual Kingdom, verses 5-8.—The Jews were chafing under the Roman yoke. They expected a Messiah who would free them from Rome, and establish an earthly kingdom greater than that of their father David. What might Jesus not accomplish if He yielded to their expectations and established an earthly kingdom? All His countrymen would rally to His side if He adopted the role of a temporal Messiah; for such a Messiah they would sacrifice their lives freely and gladly. The devil showed Him all the kingdoms of the world in a moment of time. Jesus might have all this authority and the glory of them—if He would pay the price. Would it not be a quicker and easier road to travel than the road to Calvary? To seek temporal instead of eternal good, to build up a material instead of a spiritual kingdom, would be to ally Himself with the devil, to worship before him.

The Temptation To Presume Upon God's Call, verses 9-12.—Throughout His ministry Jesus was asked for a "sign" of His divine Sonship, but here at the beginning of His work He settled that question once and for all: conscious as He was of His oneness with the Father, He would not make trial of Him to prove this to the world. "To leap unhurt from the pinnacle of the temple was to rival a mountain goat or a chamois, but it had no connection at all with spiritual power and was no sign of disposition and ability to save men from their sins. To abandon the region of men's actual need and work wonders, not for their relief but for mere display, was to trespass against the Father's love and to mistake the Father's intention."—Marquess Dods.

The Tempter Vanquished, verse 13.—When the devil had completed every temptation, he departed from Him for a season. "The moment that the obedience of the life was established, the mental tumult settled into peace within him."—Phillips Brooks.

Marine Mergers

World-Wide United States Shipping Service To Be Created

A world-wide shipping service under the United States flag will be created through a consolidation of interests of the International Mercantile Marine Company and the Roosevelt Steamship Company, which was announced in New York.

The merger, which has been rumormongered for several months, was announced by F. A. E. Franklin, president of the International Mercantile Marine. The Roosevelt Company, which was organized in 1905, will retain its corporate identity.

Remove all callouses, and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

The Best Horse Walking

After walking a distance of more than four thousand miles around the world at the Equator during the last 26 years, Fred A. Dillman, Central Vermont railway messenger, at St. Albans, is beginning his 26th year of hitching. He has averaged 16 miles per day, 300 days per year for 26 years, giving him a total walking mileage of 130,000.

Two states have post offices named "Buckeye": Virginia and Arizona.

NO MORE ECZEMA

Nothing Ends Night Away

"I had eczema for several months. Single applications of 'Eczema Ointment' cured my skin and I am now well. My skin is now clear."—John Smith, 1234 Main St., Toronto. In constant demand, retail and wholesale. Selling agents: J. H. Smith, 1234 Main St., Toronto.

Moore Low Grain Elevator

Increasing Government Grain Elevator Storage Capacity

"Although the normal capacity of the Dominion Government grain elevator at Moose Jaw (exclusive of the new 2,000,000 bushel addition) is generally placed at 3,500,000 bushels," says "The Optimizer," "this amount of grain has been exceeded on several occasions during the past few weeks. On October 30th last, a total of 3,584,792 bushels of various grains were in store, while on November 15th there were 3,670,504 bushels and on November 22nd, there were 3,552,804 bushels stored up."

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotic or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote health-giving sleep and make the dreaded teething period easy. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Exhibition Profit

Operating profit of the Canadian National Exhibition for the past year amounted to \$278,815. The city of Toronto received a cheque from exhibition officials for \$110,451; this and other payments to the city bring the amount turned into the municipal coffers for 1934 up to \$245,850.

A Nasty Headlight

Some day the captain may turn to the first mate and ask: "Hear that headlight?" Sounds funny, but John Robins, marine expert, declares that a new type of headlight with a modified radio beam, combining light and sound, will soon make navigating in fog safe.

All-Canada Phone System

The Telephone Project To Link Halifax With Vancouver

As a result of the co-operative arrangements between the seven main telephone systems of Canada, the work is now proceeding to realize an all-Canada transcontinental system that will make it possible for a firm in Halifax to speak with one in Vancouver, a distance of 4,318 miles, without using lines outside of the Dominion.

At the present time a long distance call from Montreal to Vancouver would require a connection first with Chicago then with Seattle and from there to Vancouver.

Up to the present time it has been impossible to link western Canada with eastern Canada over an all-Canadian route. This has been partly due to differences in standard equipment of the various companies, but chiefly to the fact that what is known as "long" long distance service requires somewhat different equipment than the "short haul" traffic, such as large size copper wire, etc.

With a view to inaugurating the all-Canada service, large size copper wires have already been installed between Toronto and Winnipeg, while the three government systems of Manitoba, Saskatchewan and Alberta are now at work constructing such heavy duty lines preparatory to the introduction of the all-Canada service. British Columbia and Maritime organizations are also undertaking the work, so that in the near future the construction of the line from coast to coast is expected to be complete.

At the rate the work is at present proceeding, it is anticipated that by the summer of 1935 long distance messages may be transmitted from Halifax to Calgary, and by the spring of 1937, it is expected the entire coast to coast service will be in operation.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

West Indies and Canada

Canada must assume a temporary role of "big brother" to the British West Indies if the full possibilities of trade between these parts of the Empire are to be attained, says a report issued by the Empire Club of Ottawa following a study of the subject. In other words, the report holds, Canadians must spend a greater sum in the West Indies in order that the Island citizens may be placed in a position where they can become heavy purchasers.

HUGE TELEGRAPH MERGER MAY BE ARRANGED

Montreal. — Amalgamation in a \$50,000,000 corporation of the respective commercial telegraph systems of the Canadian Pacific Railway and the Canadian National Railway is being considered by the two parties. The Canadian Press understands the proposal has also been put before the Dominion Government at Ottawa. This is the much larger idea behind the statement in Ottawa of the Earl Blackett, chairman of Imperial and International Communications, Limited, "that the Canadian Pacific and the Canadian National shall become partners with the I.I.C. in forming a Canadian overseas communication company, which shall include the Canadian Marconi Company."

The suggested amalgamation presents obvious advantages and no less obvious disadvantages. Economically there would be the saving in the present duplication from coast to coast in equipment and personnel, but even more important would be the advantages of a strong, all-Canadian corporation, able to meet competition and hold its own against all comers. For neither of the two Canadian commercial telegraph companies is really independent, because each is necessarily allied and more or less dependent upon one or other of the rival United States communication groups, the Western Union and the Postal, which again results in the bulk of overseas going through foreign rather than British channels.

This strong corporation would operate at a much lower cost and therefore at lower rates to the permanent advantage of the Canadian public. At the present time, eight commercial telegraph lines are strung across the Canadian continent, and a message, to pass from one to another and beyond, means an increasingly higher rate, constituting a heavy toll on the economic life of the country. It is probable that such an amalgamation would permit of the cutting down of these eight lines to only three: Eastern zone, from Cape Breton to the Head of the Lakes; Central zone, Head of the Lakes to Regina; Western zone, Regina to Victoria. In other words, commercial telegraph traffic would have to jump over only two or three mountains as from coast to coast, instead of over seven, while the great area of Eastern Canada would enjoy a flat rate.

Opening Of Manitoba's Legislature Announced

January 27 Date Decided On At Cabinet Meeting

Winnipeg, Man.—Manitoba's legislature will open Tuesday, January 27, Premier John Bracken has announced. Decision to convene the session on this date was reached at a cabinet meeting.

Unemployment relief measures rank as an important subject for the session. Re-adjustment of provincial taxation to enable the government to reduce the municipal levy by one-half is another important piece of business to be discussed by the members of the legislature.

Will Celebrate Diamond Jubilee

Victoria, B.C.—British Columbia will celebrate her diamond jubilee with all the pomp and circumstance befitting the occasion, at the capital of the province on July 20 this year. It was on July 20, 40 years ago, the Crown Colony of British Columbia was formally included in Confederation.

To End Slavery In Liberia

Washington, D.C.—The United States would be willing to associate itself with the League of Nations in setting up an international commission to end slavery in Liberia, the United News learned recently from a high official.

U.S. Motor Vehicle Deaths

Chicago.—There was 24,000 motor vehicle deaths in the United States in 1928, the National Safety Council estimated recently. This figure represented an increase of approximately 1,000 deaths over the 1927 period.

W. H. U. 1878

Revenue Decrease

Ordinary Revenues For Canada Decreased By \$64,000,000 In Nine Months Period

Ottawa, Ont.—Ordinary revenues of Canada decreased by \$64,000,000 approximately for the nine months ended December 31 last, as compared with the corresponding period in 1928. During the past nine months' period, according to the official financial statement issued recently, ordinary revenues totalled \$280,221,001, as against \$344,221,001 in 1928.

Ordinary expenditures increased by \$15,000,000 in the period under review. For the nine months ended December 31 last, ordinary expenditures amounted to \$295,221,001 as contrasted with \$280,221,001 for the period of 1928.

The statement represents only the receipts and payments which have passed through the books of the department of finance up to the last day of the month.

The net debt of Canada, according to the statement, shows an increase. On December 31 last, the net debt was \$2,193,748,331, as compared with \$2,138,214,730 on December 31, 1928.

Courage Needed Says Federal Woman Member

Miss MacPhail Thinks Representatives In House Should Follow Their Conscience

Brandon, Ont.—"You can take your conscience into the House of Commons, but to keep it there—oh, yes," commented Agnes MacPhail, M.P., in an address here, after reviewing the attitude of the members toward a woman colleague.

Miss MacPhail declared that there was great need today in parliament for members to follow their own consciences, and courage to stand for what was right, irrespective of party or the big interests. The House, she said, badly needed Mr. Hon. Arthur Meighen and Hon. Charles Dunning, two men of courage.

She declared that prosperity could not be secured by injecting life into one or another industry as with a hypodermic syringe, but was dependent on the prosperity of all.

Advocates Fruit Growing

Manitoba Farmer Says More Money In Fruit Than In Grain

Winnipeg, Man.—A pioneer fruit grower of the prairies told delegates to the annual convention of the Manitoba Horticultural Association recently, that fruit growing should be regarded as a profitable field by farmers.

His four acres of crab apples, plum and hybrid cherry trees netted him a greater profit last year, William Shepherd, Rathwell, Man., said, than 200 acres of grain would have. Mr. Shepherd considered fruit farming had a bright future in Manitoba.

Question Of Gold Payment

Paris, France.—The answer of the French Government to the last British note relating to the payment in gold of the French war loan, which will be remitted soon, will constitute a courteous refusal to submit the difference to the exceptional procedure of arbitration, when normally competent jurisdiction has not been invoked, it was reported recently.

In Canadian Firm

Toronto, Ont.—Dumont Motors of Canada, Limited, is now owned, controlled and operated by Canadians. It was announced by Roy D. Kerby, president and general manager of the company. The announcement said the company is now probably the only automobile company in Canada so controlled and managed.

Racer Buys For States

Southampton, England.—Capt. Malcolm Campbell, British automobile racer, sailed on the "Elmeric" for New York with his racing car, the Blufford II arrangements for his speed trials at Daytona Beach, Fla., at present somewhat confused, are not settled, he said he is ready to go on to New Zealand.

Both Germany Breeds Friction

Paris, France.—A conference of ambassadors here is believed to have discussed the question of German armaments, with the impression prevailing that Germany has allegedly failed to fulfil all disarmament promises under the Versailles treaty.

Physical Education Bureau

Captain Robert Jarman, now of Manitoba, physical education expert, who has just finished a series of demonstrations of his teaching methods in Toronto. He may be brought to Toronto when his Manitoba contract expires.

Gift From Lord Willington

Governor-General Presents Car To Children's Aid Society, Ottawa

Ottawa, Ont.—Ottawa's needy children are to have a handsome automobile of their own—the gift of the departing Governor-General and Viscountess Willington.

The generous presentation was made by Their Excellencies to Mrs. C. M. Thoburn, prominently identified with several organizations having to do with child welfare. In honoring the auto, of an expensive make and brought to the Dominion when Lord and Lady Willington first took up residence here, Their Excellencies voiced a desire that it be devoted to the use of the children for their various outings.

The car will be used by Ottawa's young folk, under direction of the Children's Aid Society.

Buys Sent On Grain Exchange

Arthur Cutten, Chicago Operator, Pays Good Price For Entry To Winnipeg Pit

Winnipeg, Man.—With wheat depressed as king in the Chicago grain pit, big operators there are transferring their activities to the Winnipeg Grain Exchange.

The latest recruit to the local pit is Arthur Cutten, Canadian-born and long called king of the traders, who Tuesday, January 12, bought a seat on the Winnipeg Grain Exchange. While his interests traded here before, this is the first time Mr. Cutten has been a qualified member of the Exchange.

Cutten is understood to have paid \$12,400 for his membership.

British Shipyards Busy

Build Over Third Of World's Commerce, Shipyard Last Quarter-Year

London, England.—Well over one-third of the total shipping under construction in the world in the quarter-year ending December 31, was in British shipyards, according to Lloyd's quarterly report. The total percentage was 38.1 out of a total of \$238,000 tons. The only figures not taken into account are the comparatively small tonnage building in Russia, which does not supply statistics.

The number of ships being built in Great Britain in the period was 181 with a total tonnage of 604,000. This was a decrease of 207,844 tons from the previous quarter, and 401,302 tons less than in the same period of 1928.

Of the tonnage being under construction, 100,000 tons were recorded in the United States, 261,215 in Germany, 179,677 in Italy, 176,215 in France, and 180,078 in Holland.

Expect Improvements In Fishing Industry

Comprehensive Survey Being Carried Out By Fisheries Department

Halifax, N.S.—A marked improvement and more stable conditions in the Canadian fishing industry are expected in the immediate future, according to Hon. E. R. Rhodes, minister of fisheries.

Speaking of the survey of the industry being carried out by the department, Hon. Mr. Rhodes said it was of such a comprehensive character that it could not be completed before next August. A study of market conditions at different seasons of the year was one of the factors involved.

New Commander Appointed

Lieut. Hart Will Take Canadian S.S. Vancouver On Winter Cruise

Ottawa, Ont.—Lieut.-Commander Frederick G. Hart, R.C.N., has been appointed to the command of H.M.C.S. Vancouver. His appointment took effect on January 26 and he will take the "Vancouver" on its winter cruise to United States and other foreign ports, leaving Esquimaut, B.C., on January 24.

Lieut.-Commander Hart joined the Royal Canadian Navy during the war as a cadet, at Halifax and was promoted to lieutenant commander in 1928. He qualified for command of destroyers while serving in the Royal Navy in 1929.

Homeless Striking Inflow

Edmonton, Alberta.—According to Provincial Government figures homeless entries and soldiers grants for the month of November amounted to 758 as against 553 for the same period last year.

BID WILLINGDONS FAREWELL ON LEAVING CANADA

Ottawa, Ont.—Ottawa said "good-bye and good luck" to Their Excellencies Viscount and Viscountess Willington. In the brightness of a sparkling diary Canada wishes day, prominent representatives of the political, diplomatic, business and social circles of the Dominion gathered to bid farewell to the Governor-General and his wife, who, for more than nine years, have lived among the Canadian people. Bright uniforms of the soldiers, who constituted travelling escort and guard of honor for Their Excellencies, flags and banners, and a large wreath of beautiful roses with its message of "Good Luck" added colour to the scene.

Headed by Mr. Hon. R. B. Bennett, prime minister, members of the Dominion cabinet were present to cheer the Willses at Viscount and Viscountess Willington for the last time. Mr. Hon. W. L. Mackenzie King, Liberal leader; Hon. G. Howard Ferguson, newly-appointed high commissioner for Canada in Great Britain; Hon. Vincent Massey, former Canadian minister to Washington, representing the federal government; in Ottawa, and others presided in various ways of life in the Dominion, were among the crowd which gathered on the steps.

After the last farewells were said, as the train moved slowly away from the platform, the Willses, who had walked to the platform of their private train, the hand of the governor-general's foot guards struck up the National Anthem, and in a minute changed to the familiar strains of "Auld Lang Syne." The crowd broke into cheers. Their Excellencies waved farewell, and the train pulled away.

Viscount and Lady Willington will spend a couple of months in England before leaving to take up their new duties in India.

From Government House, which Their Excellencies left shortly before noon to drive in the state car of the Central Station, a travelling escort of the Princess Louise Dragoon Guards accompanied them. Boy Scouts lined the drive through which the vice-regal party drove in the Government House grounds. His Excellency was Chief Scout for Canada.

Accompanying Their Excellencies were E. C. Mervill, private secretary, and Mrs. Mervill, Col. Humphrey Snow, controller of the household, and members of the staff. Mr. and Mrs. Mervill will go to India with Lord and Lady Willington.

Decision On Freight Rates Re-Affirmed

Railway Board Explains Method Of Computing Reduction In Freight Rates

Ottawa, Ont.—A re-affirmation of their former decision as to the correct method of computing how the 20 per cent. cut in maritime freight rates should be arrived at is contained in a judgment of the board of railway commissioners, delivered here.

The judgment decrees that on west-bound freight traffic the point of whose origin lies within the "select region," the reduction shall be calculated on the rate which the distance between that point of origin and the westerly limit of the "select area," Diamond Junction, bears to the whole distance from the point of origin to the ultimate destination. That is to say, a commodity transported, for example, from Montreal, N.B., to Calgary, Alta., enjoys the 20 per cent. freight reduction not on the entire Montreal-Calgary rate but on that proportion of the Montreal-Calgary rate which that commodity bears to the distance between Montreal and Diamond Junction, or Levin, Que.

Purposeful High Commissioner

Ottawa, Ont.—Canada's new High Commissioner in Great Britain—Hon. G. Howard Ferguson—became a member of the Canadian Privy Council, January 18. Appointed by Premier R. B. Bennett, the High Commissioner proceeded to Ottawa and was met by the president of the Privy Council, who took the oath as a privy councillor.

Winning Manitoba Communities in C.N.R. Progress Contests

Completion of the first year's contests in the Canadian National Railways community progress competitions for European settlements in Manitoba placed Rimbach, Ukrainian, first; Steinbach, Mennonite, second; Rimbach, Mennonite, third; E. J. Hart Ukrainian, fourth, and Steinbach, Ukrainian, fifth. Above pictures show: (1) Residence of Jacob Scholtenberg, Rimbach; (2) Rimbach school, Steinbach; (3) A. E. Pinner's farm house, Steinbach; (4) Main street of Rimbach; (5) Community Hall, Rimbach; (6) Rimbach school, Rimbach; and (7) King George school, Steinbach.

Device Restores Speech

Research into the fundamental principles of sound has led to some interesting developments for the alleviation of larynx suffering, says Dr. Dixon, director of research development of Bell Telephone Laboratories in New York.

Mr. Dixon outlined a number of recent developments in the telephone field such as a robot which translates a dictating machine into a vocal call as clear as any human voice, using moving picture film and a photo-electric cell.

Coming to the medical field, Mr. Dixon touched upon a unique attachment which virtually restores speech to those who have lost the power of speech thru a throat operation. This is known as the MacKenzie artificial larynx.

Essentially the artificial larynx

consists of a specially alloy metal rod stretched across the inside of a hard rubber soundbox, a mouthpiece which fits into a metal stem at the sound box, with a sponge rubber pad to fit snugly over the tracheal opening. The tension of the membrane may be increased or decreased to compare with the lost natural voice by simply adjusting a thumb screw.

At the side of the soundbox is a hole thru which air is inhaled into the lungs. When the user wishes to speak he places his forefinger over the aperture in order to prevent escape of his breath which is now forced against the metal diaphragm, vibrating it in response to his "pulls" of breath in his effort to speak. These "pulls" pass upward thru the soundbox and mouthpiece to the mouth where by proper formation of the lips they are transformed into intelligent and audible speech.

Seed Wheat for Germany.

About three years ago a party of gentlemen from Germany paid Stony Plain district a visit, on their itinerary thru the West. On their trip thru this district they were so enamoured of the prospects for settling here, that they left Canada with the determination to sell their estates in their home land, move to this district, and settle down.

Owing to the depression prevailing there, they were unable to negotiate satisfactory sales of their holdings, consequently were compelled to remain there until times changed for the better. They had heard, while here, so much about the good qualities of the wheat raised hereabouts—so quite recently they forwarded an order commissioning Mr. Paul Werner to purchase for them a quantity of registered seed wheat, specifying No. 1 Certified Howard wheat. Our local man succeeded in getting the order filled, and the seed wheat—400 pounds of it—on its way to its destination, via Vancouver, Panama Canal and Bremen.

If the seed makes a good showing on the farms of the syndicate in the old land, it is the intention of the party to send an exhibit of the grain to the World's Grain Exhibition to be held at Regina, Sask., from July 25th to August 4th, 1932. When the exhibit arrives at the Regina Show, Mr. Werner expects to make the trip down there, to take charge of it.

Bright Back Brisk

Mr. Wertz landed a jack-fish measuring over three feet on the lake near his winter home.

Mr. W. Clausen has the new residence on his farm nearly completed.

A surprise party was given Mr. and Mrs. W. Hodgson, on Friday night. Neighbors and friends present numbered 137.

The slugging bout which took place here last week between two friends resulted in one getting a black eye. The winner is being entered in the heavyweight class for the boxing tournament in Edmonton, Feb. 20.

Dance at Muir Lake Community Hall the Evening of Friday, Jan. 20th. Rhythm and Orchestra. Everybody come.

Lost, Brown and Bay Clydes Mare, 1 year old, branded 88 quarter circle on top, on the right shoulder. Henry Webster on P. Hooker, Stony Plain. 48

Junior Hockey.

The Juniors' game with Winterburn Thins, attracted a good-sized crowd of fans, many of them coming up with the visiting team, to see the latter trim the locals. Altho the final score was adverse to our boys, the latter have much to be proud of for the good showing made against the Winterburn Heavies.

It took two overtime periods for the Juniors to get a decision over the Calahans. In their game at Calahan on Sunday afternoon, The Stumps didn't seem able to get up steam enough to play their usual good game. A feat of the game was the good work done in the goal by Willie Miller. Cally scored 4 goals, and Stony 3 goals made by Alvin Willis, J. Trapp, 2, Kuder's.

The Juniors play at Oatway tonight. As Oatway whipped Calahan the other night by a 12 to 0 score; and as Stony had their troubles beating Calahan Sunday, it looks as if the Juniors are billed for a good night's work.

Calendar.

JANUARY—
21—Dance at Rollers Hall

United Church service every Sunday Evg. at 7:30.
On Sunday, Feb. 15th, English Lutheran service at St. Matthew's Schoolhouse at 7:30 p.m., by Rev. H. Koring.

WHY SUFFER FROM HEADACHES,

Pain in and around the Eyes?
The right glasses fitted to your eyes will surely relieve you and give you comfort.
Glasses furnished Free.
Fifteen dollars examination fee.
That is far cheaper than paying \$5 to \$10 for an examination and then glasses at \$15 to \$25; but you cannot see the logic of this; you need more than glasses.

Hoist Ship Through Window

When it was decided to exhibit in a London department store for the Christmas season, the historic half-ton water-line model of the Canadian Pacific super-class "Empress of Britain" which had been featured a few weeks previously in the Lord Mayor's Show, it was found necessary to lift the model about thirty feet in the air so that its great size might be safely admitted to the department store by an upper window. The photographer has caught the scene just as the model is entering the window. Traffic was blocked for an hour during the hoisting of the model, which was carried out with complete silence.
